Using the Online Safety Policy Template

An Online safety policy provides educational settings with a framework to develop their online safety ethos and enables leaders and managers to detail strategic approaches and considerations, with regards to the safer use of technology.

The online safety policy should be recognised as a safeguarding policy, not a technical or computing policy and falls within the role and responsibilities the Designated Safeguarding Lead (DSL).

There is no requirement for educational settings to have a separate online safety policy if online safety issues are appropriately addressed within other policies; this decision will be down to leaders and managers. If online safety is embedded within existing documents, settings should ensure that their community is aware of how and where to locate safety information, especially regarding responding to and reporting specific online safety concerns.

We encourage all educational settings to ensure that their online safety policy is individualised for their own specific context, to ensure that it is fit for purpose. It will not be appropriate for educational settings to adopt this template in its entirety; some statements will be more relevant to some settings than others.

This policy template requires leaders, managers and DSLs to adapt the content to include specific local information such as their own named points of contact, as well as their specific procedures and expectations. These decisions and details will vary from setting to setting, so this template should be used as a starting framework.

- Grovelands Community Primary School governors and leaders have ensured that our setting has age and ability appropriate filtering and monitoring in place, to limit learner's exposure to online risks.

- The leadership team will ensure that regular checks are made to ensure that the filtering and monitoring methods are effective and appropriate.
- All members of staff are aware that they cannot rely on filtering and monitoring alone to safeguard learners; effective classroom management and regular education about safe and responsible use is essential.

- Whole-class or group email addresses may be used for communication outside of the setting.

7.9 Live Stream Lessons for Remote Learning

- Live stream is a somewhat broad term and, in some cases, can refer to a platform where the teacher and the children are all linked into a video call/conference and see one another. In other cases, it may refer to a live broadcast, where only the teacher, or whoever is providing the content, is visible and the children are viewing the content, without being seen themselves. In the latter example, although not linked into the broadcast with their images, the children may be able to interact through a live chat function.
- When planning the use of live stream platforms within remote learning our school will:
 - Consider whether the technology is available to children/families and make alternative arrangements for provision where necessary.
 - Ensure that staff are trained to use the technology.
 - Ensure that children's behaviour/interactions are managed in line with the expectations of the school behaviour policy.
 - Risk assess the platform being used and consider whether there are functions, such as live chat, pupil's use of video camera, or the recording of the session, which need to be disabled or which require further measures to support their appropriate use.

The above points are relevant to live stream in its broadest sense. What follows next is more relevant, but not exclusively, to the use of platforms allowing two-way video interaction between all users.

- Two members of staff will be 'within the room' when conducting a live stream session with pupils. If the session is being run from school and both adults are there, then they can be physically within the same room. If one or both adults are working remotely then this means that two adults will need to be present within the video call, and they should both be there before the pupils dial in.
- The second member of staff is there to provide a safeguard for both the pupils and the teacher, so does not need to be a curriculum specialist.
- The second member of staff could act additionally as technical/behaviour support, in terms of monitoring pupils' interactions and ensuring they are not using chat or recording features if these cannot be disabled.
- Sessions will be planned and scheduled for during school hours.
- Parents will be contacted to advise that the session is taking place and they and the child should consent to abide to an acceptable use agreement covering issues such as not recording the session, not using the live chat feature, being appropriately dressed etc.
- Only school devices and school contact numbers/emails will be used for communications and running the session.
- Only live streaming platforms approved by SLT will be used.
- Staff will dress professionally and choose a neutral background for their video stream.
- Pupils should be dressed appropriately e.g. clothes they might wear for a non-uniform day, not pyjamas.

- Pupils should live stream from a suitable location within their household, not bedrooms.
- Staff behaviour and language will be entirely in line with the staff code of conduct.
